

As an entrepreneur, I have a proven record of job creation and problem solving. I hold an Electronic Engineering Degree and an MBA degree. I am confident I can help make our city more financially stable and our government work better.

I want to help create new jobs in Lake Elsinore by helping new businesses open and existing businesses flourish. I will work to eliminate red tape and delays that lead to frustration and keep new, environmentally responsible projects from moving forward.

I am committed to public safety and supporting the men and women who protect and serve our community and keep us safe.

I strongly believe that increasing access to education and technology is critical for our workforce and will build a stronger economy that leads to a more connected and safer community.

"Dream Extreme" is a great slogan, but it's currently just a dream. Job creation, government efficiency and fiscal responsibility will bring the dream closer to reality for the citizens of Lake Elsinore.

I would be grateful for your vote.
