

I am proud to have been City Treasurer over the past decade because of the fantastic progress made by our City management team and hardworking City Council. As the founding director of a large nonprofit housing group in Orange County, I've had the benefit of witnessing many municipal governments and our City of Lake Elsinore stands head and shoulders over all those with which I've had experience. Experts agree: Our great credit rating is a result of critical judging our management team, our budget and audit process as well as our governance abilities.... the City rates very well on almost all categories and I am proud to be associated with that team.

Those of you that participate in your neighborhood and community by volunteering know what I'm talking about. Please take the time to use our website and other digital tools.

The City has sailed through big floods, fires, fish kills, poppies and a worldwide pandemic while building a world-class resort (Launch Point) and a great new road (Camino del Norte which will be paid for by businesses that will arise along its shoulders.

You have a great City for which to take pride. Enjoy your City!

with great pride, Your incumbent City Treasurer,
Allen Peters Baldwin
