

GREEN BUILDING RESIDENTIAL CERTIFICATION CHECKLIST AT FINAL INSPECTION

As contractor/architect/owner/engineer, I _____ certify that the following green building code requirements have been incorporated into the new residential building at _____, authorized by building permit # _____.

- _____ Surface drainage
- _____ Indoor water use fixtures are in compliance with Item 1 on Green Building Code Mandatory Residential Requirements (GBCMRR) document.
- _____ Outdoor water use in compliance with the GBCMRR.
- _____ Joints and openings in the building envelope have been sealed in compliance with the GBCMRR
- _____ Construction Waste Reduction, Disposal and Recycling report verified.
- _____ A copy of the Operational and Maintenance Manual required by the GBCMRR has been placed at the site.
- _____ Fireplace compliance with emissions verified to comply with 4.503.1 and AQMD 445.
- _____ Duct openings and mechanical equipment protection during construction was verified
- _____ Adhesives, sealants, caulks, paints, coatings, aerosol paints, carpet systems, resilient flooring systems, and composite wood products used at the site are in compliance with the GBCMRR
- _____ The concrete slab (if applicable) for the project has been installed with capillary break per plans.
- _____ The moisture content of the floor and wall framing did not exceed 19 percent when the building framing was enclosed.
- _____ Each room containing a bathtub, shower or tub/shower combination has been provided with an approved mechanical exhaust fan with humidistat and/or signage according to the GBCMRR
- _____ A whole house exhaust fan if installed is in compliance with R-4.2 insulation when off per the GBCMRR.
- _____ The heating and air-conditioning system is in compliance with the plans and the GBCMRR
- _____ I have reviewed all of the above items and the Mandatory Measures incorporated into the plans and find this project in compliance with the CALGreen Code.
