Subject: Phase I Environmental Site Assessment
Lakeview Plaza
Lake Elsinore, California

Dear Mr. Motamed:

This report presents the findings of a Phase I Environmental Site Assessment (ESA) completed by Rincon Consultants, Inc. for the property identified as Lakeview Plaza and Assessor's Parcel Numbers 375-092-002, 375-092-003, 375-092-004, 375-092-005, and 375-092-006 located on the corner of Lakeshore Drive and Manning Street in Lake Elsinore, California. The Phase I ESA was performed in accordance with our proposal and contract dated July 10, 2019.

The accompanying report presents our findings and provides an opinion regarding the presence of recognized environmental conditions. Our work program for this project, as referenced in our contract, is intended to meet the guidelines outlined in the American Society for Testing and Materials (ASTM), Standard Practice for Environmental Site Assessments: *Phase I Environmental Site Assessment Process* (ASTM Standard E-1527-13). Our scope of services, pursuant to ASTM practice, did not include any inquiries with respect to asbestos, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, vapor intrusion or other indoor air quality, mold, or high-voltage power lines.

Thank you for selecting Rincon for this project. If you have any questions, or if we can be of any future assistance, please contact us.

Sincerely,
Rincon Consultants, Inc.

Executive Summary

This report presents the findings of a Phase I Environmental Site Assessment (ESA) for the property identified as Lakeview Plaza and Assessor's Parcel Numbers 375-092-002 through 2-006 located on the corner of Lakeshore Drive and Manning Street in Lake Elsinore, California (Figure 1, Vicinity Map). The Phase I ESA was performed for Lakeview Centre, LLC by Rincon Consultants, Inc. (Rincon). Lakeview Centre, LLC has requested this assessment and will use the information for the purpose of purchasing the subject property. The subject property currently consists of vacant, undeveloped land.

The subject property is located in an area that is primarily composed of vacant land with some residential and commercial land uses. Properties in the vicinity of the subject property include Lake Elsinore, undeveloped land, single-family homes, restaurants, gasoline stations, and other retail uses.

Rincon performed an unaccompanied reconnaissance of the subject property on August 20, 2019. The purpose of the reconnaissance was to observe existing conditions and to obtain information indicating the presence of recognized environmental conditions in connection with the subject property. During the site reconnaissance, Rincon did not note any environmental concerns at the subject site.

Environmental Data Resources, Inc. (EDR) was contracted to provide a database search of public lists of sites that generate, store, treat or dispose of hazardous materials or sites for which a release or incident has occurred. The EDR search was conducted for the subject property and included data from surrounding sites within a specified radius of the property. The subject property and adjacent properties were not listed in any of the databases searched by EDR. Three nearby properties within one-half mile of the subject property were listed on the Leaking Underground Storage Tank (LUST) database: Jess Rodriguez Disposal Co., Chevron #95543, and Howard, Ken. All three sites were granted a Closure/No further Action letter – closed cases. The distance of these sites to the subject property varies from 0.20 miles to 0.32 miles. The only site of the three which was located upgradient to the water flow at the subject property, Howard, Ken, had only the soil affected by the by the underground tank leakage; no groundwater contamination was determined to be associated with the site. Due to the forementioned reasons, none of three sites are expected to be adversely impacting the subject property.

Historical sources reviewed as part of the Phase I ESA include aerial photographs and topographic maps. The aerial photographs reviewed indicate that the subject property has been undeveloped land since at least 1935. The historical topographic maps reviewed depict the subject property as undeveloped land from at least 1901.

Based on the findings of this Phase I ESA, it is our opinion that there are no recognized environmental conditions in connection with the subject property.

Introduction

This report presents the findings of a Phase I ESA conducted for the property identified as Lakeview Plaza and Assessor's Parcel Numbers 375-092-002 through -006 located on the corner of Lakeshore Drive and Manning Street in Lake Elsinore, California (Figure 1, Vicinity Map). The Phase I ESA was performed by Rincon Consultants, Inc. (Rincon) for Lakeview Centre, LLC in general conformance with ASTM E 1527-13, our proposal and contract dated July 10, 2019. The following sections present our findings and provide our opinion as to the presence of recognized environmental conditions (RECs) on the subject property.

Purpose

Lakeview Centre, LLC has requested this assessment and will use the information for the purpose of purchasing the subject property. The purpose of this Phase I ESA was to determine if there are RECs on the subject property, taking into account commonly and reasonably ascertainable information and to qualify for Landowner Liability Protections under the Brownfields Amendments to the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).

An REC is defined pursuant to ASTM E 1527-13 as,

“the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment; 3) under conditions that pose a material threat of a future release to the environment”.

A Controlled REC is defined pursuant to ASTM E 1527-13 as,

“a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized environmental condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report”.

A Historical REC is defined pursuant to ASTM E 1527-13 as,

“a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by regulatory authority, without subjecting the property to any required controls (for example, use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in

the regulatory criteria). If the EP [Environmental Professional] considers the past release to be a recognized environmental condition at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition”.

A *de minimis* condition is defined pursuant to ASTM E 1527-13 as,

“a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* conditions are not recognized environmental conditions nor controlled recognized environmental conditions”.

Scope of Services

The scope of services conducted during this study is outlined below:

- Performed a reconnaissance of the subject property to identify obvious indicators of the existence of hazardous materials.
- Observed adjacent or nearby properties from public thoroughfares in an attempt to determine if such properties are likely to use, store, generate, or dispose of hazardous materials.
- Obtained and reviewed an environmental records database search to obtain information about the potential for hazardous materials to exist at the subject property or at properties located in the vicinity of the subject property.
- Reviewed files for the subject property and immediately adjacent properties as identified in the database report, as applicable.
- Reviewed the current United States Geological Survey (USGS) topographic map to obtain information about the subject property and regional topography and uses of the subject property and surrounding sites.
- Reviewed additional pertinent record sources (e.g., California Division of Oil, Gas, and Geothermal Resources records, online databases of hazardous substance release sites), as necessary, to identify the presence of RECs at the subject property.
- Reviewed reasonably ascertainable historical resources (e.g., aerial photographs, topographic maps, fire insurance maps, city directories) to assess the historical land use of the subject property and adjacent properties.
- Provided a user interview questionnaire to a representative of the client, the user of the Phase I ESA.
- Provided a property owner interview questionnaire to the property owner or a designated subject property representative identified to Rincon by the client.
- Conducted interviews with other property representatives (e.g., key site manager, occupants), as applicable.
- Reviewed available client-provided information (e.g., previous environmental reports, title documentation).

Significant Assumptions, Limitations, Deviations, Exceptions, Special Terms, and Conditions

This work is intended to adhere to good commercial, customary, and generally accepted environmental investigation practices for similar investigations conducted at this time and in this geographic area. No guarantee or warranties, expressed or implied are provided. The findings and opinions conveyed in this report are based on findings derived from a site reconnaissance, review of an environmental database report, specified regulatory records and historical sources, and comments made by interviewees. This report is not intended as a comprehensive site characterization and should not be construed as such. Standard data sources relied upon during the completion of Phase I ESAs may vary with regard to accuracy and completeness. Although Rincon believes the data sources are reasonably reliable, Rincon cannot and does not guarantee the authenticity or reliability of the data sources it has used. Additionally, pursuant to our contract, the data sources reviewed included only those that are practically reviewable without the need for extraordinary research.

Rincon has not found evidence that hazardous materials or petroleum products exist at the subject property at levels likely to warrant mitigation. Rincon does not under any circumstances warrant or guarantee that not finding evidence of hazardous materials or petroleum products means that hazardous materials or petroleum products do not exist on the subject property. Additional research, including surface or subsurface sampling and analysis, can reduce the client's risks, but no techniques commonly employed can eliminate these risks altogether.

In addition, pursuant to ASTM E 1527-13 practice, our scope of services did not include any inquiries with respect to asbestos containing building materials, biological agents, cultural and historic resources, ecological resources, endangered species, health and safety, indoor air quality unrelated to release of hazardous substances or petroleum products into the environment, industrial hygiene, lead-based paint, lead in drinking water, mold, radon, regulatory compliance, wetlands, or high voltage power lines.

User Reliance

Lakeview Centre, LLC has requested this assessment and will use the information for the purpose of purchasing the subject property. This Phase I ESA was prepared for use solely and exclusively by Lakeview Centre, LLC and the City of Lake Elsinore. No other use or disclosure is intended or authorized by Rincon. Also, this report is issued with the understanding that it is to be used only in its entirety. It is intended for use only by the client and the City of Lake Elsinore, and no other person or entity may rely upon the report without the express written consent of Rincon.

Site Description

Location

The subject property is an approximately 5.0-acre parcel located north of Lake Elsinore, bounded by Manning Street to the east, Lakeshore Drive to the south, and Ryan Avenue to the north in Lake Elsinore, California (Figure 2, Site Map). The property is identified as Lakeview Plaza and Assessor's Parcel Numbers 375-092-002 through-006.

Subject Property and Vicinity General Characteristics

The subject property currently consists of vacant, undeveloped land.

The subject property is located in an area that is primarily composed of vacant land with some residential and commercial land uses. Properties in the vicinity of the subject property include Lake Elsinore, undeveloped land, single-family homes, restaurants, gasoline stations, and other retail uses. The current adjacent land uses are described in Table 1 and depicted on Figure 3, Adjacent Land Use Map.

Table 1 Current Uses of Adjacent Properties

Area	Use
Northern Properties	Ryan Avenue, followed by vacant, undeveloped land to the northwest, with some residential developments to the northeast.
Eastern Properties	Manning Street, followed by vacant, undeveloped land and several single-family homes.
Southern Properties	Lakeshore Drive, followed by vacant, undeveloped land, and Lake Elsinore.
Western Properties	Vacant, undeveloped land and a restaurant to the southwest.

Descriptions of Structures, Roads, Other Improvements on the Site

The subject property currently consists of vacant, undeveloped land.

Access to the subject property is available from Lakeshore Drive and Manning Street.

The following utility providers service the subject property area:

- Electrical Service – Southern California Edison
- Natural Gas Service – Southern California Gas Company
- Water and Sewer Service – Elsinore Valley Municipal Water District
- Solid Waste – CR&R Disposal

User-Provided Information

As described in ASTM E 1527-13 Section 6, Lakeview Centre, LLC was interviewed for actual knowledge pertaining to the subject property to help identify RECs. Hamid Madjidi, one of the share holders and owners of the subject property, being joined by the other share holders and owners of the subject property, completed the User Questionnaire as provided by ASTM Appendix X3 on August 28, 2019. A copy of the completed questionnaire is included as Appendix A.

Based on our review of the completed questionnaire, Mr. Madjidi indicated the following:

- A purchase transaction is planned for the subject property.
- No prior environmental site assessment reports are available for the subject property.

Based on our review of the completed questionnaire, Mr. Madjidi reviewed the following sources of information and is unaware of information regarding the following:

- Recorded land title records (or judicial records, where appropriate) that identify any environmental liens filed or recorded against the subject property
- Recorded land title records (or judicial records, where appropriate) that identify any activity and land use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the subject property under federal, tribal, state or local law
- Title Report that identifies information pertaining to environmental cleanup liens or AULs for the subject property

Based on our review of the completed questionnaire, Mr. Madjidi is unaware of information regarding the following:

- Specialized knowledge or experience related to the subject property or nearby properties
- Commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases
- Obvious indicators that point to the presence or likely presence of releases at the subject property
- Pending, threatened, or past litigation relevant to hazardous substances or petroleum products, in, on, or from the subject property
- Pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property
- Notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products

Additionally, Mr. Madjidi indicated that the purchase price being paid for the subject property reasonably reflects the fair market value of the property, and he is not aware of a reduction in value for the subject property relative to any known environmental issues.

The following geotechnical report was provided to Rincon:

- Soil and Foundation Evaluation Report – Proposed Commercial Buildings – Lots 14-17 APN Numbers; 375-092-002, 003, 004, 005, & 006, Lakeshore Drive, Lake Elsinore, California prepared by Soil Pacific Inc. and dated February 13, 2019. The report concluded that proposed

construction is feasible from a soils engineering standpoint. The report also encountered four geologic units on the subject property, being "(Qaf); alluvium and colluvium (Qal/Qcol) – which is correlative with Morton's alluvium (Qyva); a phyllite, or slate, bedrock (Mzp); and an igneous bedrock (Khg)."

Records Review

Physical Setting Sources

Topography

The current USGS topographic map (Lake Elsinore Quadrangle, 2012) indicates that the subject property is situated at an elevation of about 1,280 feet above mean sea level with topography sloping down to the south towards Lake Elsinore. During the site reconnaissance, Rincon noted that the subject property consists of hilly terrain to the northeast, sloping down and being relatively flat to the southwest. Adjacent topography consists of some hilly, generally upward sloping, terrain to the north and northeast, with generally flat, slightly down-sloping topography to the south.

Geology and Hydrogeology

Lake Elsinore is within the Peninsular Ranges Geologic Province of California (California Geologic Survey [CGS], 2002). This province is characterized by northwest-trending mountains and faults. Rocks within the Peninsular Range Province were emplaced during Cretaceous orogenic events and uplifted into the present mountain ranges during the late Tertiary and Quaternary periods. Igneous, volcanic, metamorphic, and sedimentary rocks are all found within the Peninsular Ranges. The area is seismically active, with several known active faults crossing the Province (CGS, 2002). According to CGS, the Ivy North Glen Fault crosses the site.

Site Geology

According to the current USGS Geologic Map (Elsinore Quadrangle, 2003), the subject property is underlain by young alluvial-valley deposits, which are described as consisting of unconsolidated sand, silt, and clay-bearing alluvium from the early Holocene and the late to middle Pleistocene epoch. Also, the northern, hilly terrain of the subject property is underlain by Phyllite, which is described as containing small elongate prisms of fine-grained white mica.

The owner provided a geotechnical report for the subject property, titled *Soil and Foundation Evaluation Report – Proposed Commercial Buildings – Lots 14-17 APN Numbers; 375-092-002, 003, 004, 005, & 006, Lakeshore Drive, Lake Elsinore, California*, prepared by Soil Pacific Inc., and dated February 13, 2019. The report concluded that proposed construction is feasible from a soils engineering standpoint. The report also encountered four geologic units on the subject property, being “(Qaf); alluvium and colluvium (Qal/Qcol) – which is correlative with Morton’s alluvium (Qyva); a phyllite, or slate, bedrock (Mzp); and an igneous bedrock (Khg).”

Regional Groundwater Occurrence and Quality

The subject property is located within the Elsinore Valley groundwater basin (California Department of Water Resources [DWR], 2003).

During the preparation of this Phase I ESA, we reviewed the California State Water Resources Control Board’s (SWRCB’s) online GeoTracker database to determine groundwater flow direction in the vicinity of the subject property. According to the *Case Closure Summary, Leaking Underground Storage Tank Program, Chevron #9-5543, 16830 Lakeshore Drive, Lake Elsinore, California* dated

October 2010¹, groundwater is reported to be between 41 to 53 feet below ground surface. According to the maps available in the quarterly progress report for the first quarter of 2010, the flow of groundwater flows southwest, following the downward slope. This property is located approximately 1,800 feet northwest of the subject property. The groundwater flow at the subject property is likely southward, following the downward slope towards Lake Elsinore.

Standard Environmental Record Sources

EDR was contracted to provide a database search of public lists of sites that generate, store, treat or dispose of hazardous materials or sites for which a release or incident has occurred. The EDR search was conducted for the subject property and included data from surrounding sites within specified radii of the property. A copy of the EDR report, which specifies the ASTM search distance for each public list, is included as Appendix B. As shown on the attached EDR report, federal, state and county lists were reviewed as part of the research effort. Please refer to Appendix B for a complete listing of sites reported by EDR and a description of the databases reviewed.

The Map Findings Summary, included in the EDR report, provides a summary of the databases searched, the number of reported facilities within the search radii, and whether the facility is located onsite or adjacent to the subject property. The following information is based on our review of the Map Findings Summary and the information contained in the EDR report.

Subject Property

The subject property was not listed on any of the regulatory databases reviewed.

Offsite Properties

Offsite properties listed by EDR fall under two general categories of databases: those reporting unauthorized releases of hazardous substances (e.g., Leaking Underground Storage Tank [LUST], National Priority List [a.k.a. Superfund sites], and corrective action facilities), and databases of businesses permitted to use hazardous materials or generate hazardous wastes, for which an unauthorized release has not been reported to a regulatory agency.

Rincon reviewed the EDR Radius Map and select detailed listings to evaluate their potential to impact the subject property, based on the following factors:

- Reported distance of the facility from the subject property
- The nature of the database on which the facility is listed, and/or whether the facility was listed on a database reporting unauthorized releases of hazardous materials, petroleum products, or hazardous wastes
- Reported case type (e.g., soil only, failed underground storage tank [UST] test only)
- Reported substance released (e.g., chlorinated solvents, gasoline, metals)
- Reported regulatory agency status (e.g., case closed, “no further action”)
- Location of the facility with respect to the reported groundwater flow direction (discussed in the Geology and Hydrogeology section of this report)

¹ https://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0606500051

Facilities/properties that were interpreted by Rincon to be of potential environmental concern to the subject property, based on one or more of the factors listed above, are summarized in Table 2. In accordance with ASTM, contamination migration pathways in soil, groundwater, and soil vapor were considered in our analysis of offsite properties of potential environmental concern.

Table 2 EDR Listing Summary of Select Sites Within One-Half Mile of the Subject Property

Site Name	EDR Site ID	Site Address	Distance from Subject Property	Database Reference
Nearby Sites				
Jess Rodriguez Disposal Co.	A	30760 Wisconsin Street, Lake Elsinore, CA 92330	Approximately 0.20 miles northwest	HIST UST, LUST , HIST CORTESE, CERS
Chevron #95543	C	16830 Lakeshore Drive, Lake Elsinore, CA 92330	Approximately 0.28 miles west-northwest	LUST , SWEEPS UST, CA FID UST, HIST CORTESE, HIST UST, CERS
Howard, Ken	9	17070 Shrier Drive, Lake Elsinore, CA 92330	Approximately 0.32 miles north-northwest	LUST , HIST CORTESE, Notify 65, CERS

Regulatory agency information reviewed for the listings in the table above are summarized in the Additional Environmental Record Sources section of this report.

Orphan Listings

EDR reported two unmapped records, both associated with a drycleaner located at 16746 Lakeshore Drive, Lake Elsinore, CA 92530. The drycleaner is located approximately 0.44 miles west-northwest of the subject property. EDR records indicate that the drycleaner is listed under the (OTHER) database and employs perchloroethylene emitting dry cleaning equipment. Due to the distance of the drycleaner to the subject property and the lack of reported releases, the drycleaner is not expected to be adversely impacting the subject property.

Additional Environmental Record Sources

Review of Agency Files

As a follow-up to the database search, Rincon reviewed regulatory information for facilities within the specified search radii that were interpreted to have the potential to impact the subject property, based on one or more factors previously discussed (e.g., distance, open case status, upgradient location, soil vapor migration).

The following is a summary of our review of regulatory information obtained from review of online sources (e.g., SWRCB GeoTracker database, Department of Toxic Substances Control [DTSC] EnviroStor database) and/or files requested from the applicable regulatory agency, as described below.

Subject Property

The subject property was not listed in any of the databases searched by EDR.

Adjacent Properties

Adjacent properties were not listed in any of the databases searched by EDR.

Nearby Sites

Three nearby Leaking Underground Storage Tank (LUST) database listed properties were identified within one-half mile of the subject property in the EDR database report.

- **Jess Rodriguez Disposal Co.:** This property is located approximately 0.20 miles northwest of the subject property. As the general flow direction of groundwater is southward, this site is considered to be cross-gradient of the subject property. The site was listed in the LUST database in 1993 with a record showing potential gasoline contamination of the aquifer used for drinking water supply. The site underwent remediation and was granted a Closure/No Further Action Letter in 1998. Based on the closed case status, the distance from the subject property (0.20 miles), and the cross-gradient location of this property, this nearby site is not expected to be adversely impacting the subject property.
- **Chevron #95543:** This property is located approximately 0.28 miles west-northwest of the subject property. As the general flow direction of groundwater is southward, this site is considered to be cross-gradient of the subject property. The site was listed in the LUST database in 1982 with a record showing potential gasoline contamination of the aquifer used for drinking water supply. The site underwent remediation and was granted a Closure/No Further Action Letter in 2011. Based on the closed case status, the distance from the subject property (0.28 miles), and the cross-gradient location of this property, this nearby site is not expected to be adversely impacting the subject property.
- **Howard, Ken:** This property is located approximately 0.32 miles north-northwest of the subject property. As the general flow direction of groundwater is southward, this site is considered to be upgradient of the subject property. The site was listed in the LUST database in 1989 with a record showing potential gasoline contamination of the soil. The leak was stopped in 1989 and the site was granted a Closure/No Further Action Letter in 1990. Based on the closed case status, the distance from the subject property (0.32 miles), and the only media affected being soil, this nearby site is not expected to be adversely impacting the subject property.

Review of State of California Division of Oil, Gas, and Geothermal Resources Records

A review of the Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR) Online Mapping System² indicates that no oil wells are located on the subject property or adjacent properties, or within one-quarter mile of the subject property.

Review of National Pipeline Mapping System Records

A review of the National Pipeline Mapping System (NPMS) online Public Map Viewer³ indicates that no gas transmission pipelines or hazardous liquid pipelines are located on the subject property or adjacent properties.

² <https://maps.conservation.ca.gov/doggr/wellfinder/>

Review of Cortese Site Listings

A review of the DTSC EnviroStor Database⁴ indicates the neither the subject property or any nearby sites within one mile of the subject property are listed on the Hazardous Waste and Substances Sites (Cortese) List.

Known or Suspect Contaminated Release Sites with Potential Vapor Migration

The EDR report was reviewed to identify nearby known or suspect contaminated sites that have the potential for contaminated vapor originating from the nearby site to be migrating beneath the subject property. Based on the ASTM E 2600-15, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*, the following minimum search distances were initially used to determine if contaminated soil vapors from a nearby known or suspect contaminated site have the potential to be migrating beneath the subject property:

- 1/10 mile (528 feet) for petroleum hydrocarbons
- 1/3 mile (1,760 feet) for other contaminants of concern (COCs)

If upgradient known or suspect contaminated sites are located within the above referenced distances from the subject property, online resources are reviewed to determine the extent of the contaminated plume at those sites. The following describes search distances for contaminated plumes of petroleum hydrocarbons (30 feet from the subject property) and other COCs (100 feet from the subject property). Per ASTM E 2600-15, vapors associated with impacted soil or groundwater present within these distances have the potential to migrate beneath the subject property.

Petroleum Hydrocarbons

Based on our review of the EDR report information as indicated above, there are no upgradient known or suspect petroleum hydrocarbon contaminated sites within 528 feet of the subject property. Therefore, per ASTM E 2600-15, as this distance exceeds the 30-foot distance considered the critical distance wherein such migration may pose a threat to the subject property, there are no potential threats to the subject property posed by the potential migration of petroleum hydrocarbon vapors from listed sites.

Other COCs

Based on our review of the EDR report, there are no upgradient known or suspect sites contaminated with other COCs within 1,760 feet of the subject property. Therefore, per ASTM E 2600-15, as this distance exceeds the 100-foot distance considered the critical distance wherein such migration may pose a threat to the subject property, there are no potential threats to the subject property posed by the potential migration of other COC vapors from listed sites.

Historical Use Information on the Property and the Adjoining Properties

The historical records review completed for this Phase I ESA includes aerial photographs, topographic maps, city directories, and building permits as detailed in the following sections. Copies of the historical resources reviewed are included in Appendix C. Table 3 provides a summary of the historical use information available for the subject property.

Review of Historical Aerial Photographs

Aerial photographs from EDR's aerial photograph collection were obtained and reviewed on August 30, 2019. In addition, a current aerial from Google Earth was reviewed.

Review of Historical Topographic Maps

Historical topographic maps from EDR's map collection were obtained and reviewed on August 30, 2019.

Review of City Directory Listings

EDR was contracted to provide copies of city directory listings for the subject property. As indicated in the attached report, no records were provided for the northern and eastern adjacent properties.

Review of Fire Insurance Maps

EDR was contracted to provide copies of fire insurance maps (i.e., Sanborn maps) for the subject property. As indicated in the attached report, fire insurance maps were not available for the subject property or adjacent properties.

Review of County of Riverside Building Permit Records

Building permit records issued for the subject property after July 1997 were reviewed on the County of Riverside Transportation and Land Management Agency's online building permits database⁵ on August 30, 2019. According to the database, no building permits have been issued for properties identified by Assessor's Parcel Numbers 375-092-002, 375-092-003, 375-092-004, 375-092-005, and 375-092-006.

Other Historical Sources

Based on the historical information obtained, no additional historical sources were reviewed.

Summary of Historical Uses

Subject Property

Based on our review of the documents listed above and summarized in Table 3 below, the aerial photographs reviewed depict the subject property as undeveloped land from at least 1935. The historical topographic maps reviewed depict the subject property as undeveloped land from at least 1901.

⁵ http://onlineservices.rctlma.org/content/permits_by_parcel_numberPLUS.aspx

Table 3 Historical Use of the Subject Property

Year	Use	Source
Subject Property		
1901	The subject property is depicted as undeveloped land.	Topographic Map (TM) – Elsinore Quadrangle
1938	The subject property appears to be undeveloped land. A dirt road runs through the subject property.	Aerial Photograph (AP) – USDA
1949	Similar to the 1938 AP.	AP – USDA
1953	Similar to the 1949 AP.	AP – USDA
1953	Similar to the 1901 TM.	TM – Elsinore Quadrangle
1961	Similar to the 1953 AP.	AP – USDA
1967	Similar to the 1961 AP. A dirt road no longer runs through the subject property.	AP – USDA
1973	Similar to the 1953 TM.	TM – Lake Elsinore Quadrangle
1974	Similar to the 1967 AP.	AP – USGS
1978	Similar to the 1974 AP.	AP – USDA
1978	Similar to the 1973 TM.	TM – Lake Elsinore Quadrangle
1982	Similar to the 1978 TM.	TM – Lake Elsinore Quadrangle
1985	Similar to the 1978 AP.	AP – USDA
1988	Similar to the 1982 TM.	TM – Lake Elsinore Quadrangle
1989	Similar to the 1985 AP.	AP – USDA
1994	Similar to the 1990 AP.	AP – USGS/DOQQ
1997	Similar to the 1988 TM.	TM – Lake Elsinore Quadrangle
2005	Similar to the 1994 AP.	AP – USDA/NAIP
2009	Similar to the 2005 AP.	AP – USDA/NAIP
2012	Similar to the 2009 AP.	AP – USDA/NAIP
2012	Similar to the 1997 TM.	TM – Lake Elsinore Quadrangle
2016	Similar to the 2012 AP.	AP – USDA/NAIP

Northern Adjacent Property

Based on our review of the available aerial photographs of the subject property and surrounding areas, it appears that the northern adjacent properties have been undeveloped since 1938, except for a small structure on the eastern portion of the northern adjacent properties. The small structure,

which now seemingly functions as a residential single family home, has expanded slightly over the years up to present day. The rest of the northern adjacent properties have remained unchanged. The historical topographic maps reviewed depict the northern adjacent properties as undeveloped land from 1901 to 1938. A small structure appears on the eastern portion of the northern adjacent properties in 1938 and remains to present day.

Eastern Adjacent Property

Based on our review of the available aerial photographs of the subject property and surrounding areas, it appears that the eastern adjacent properties have been undeveloped since 1938. Some development of the eastern adjacent properties are depicted in 1949 and by 1978, a small structure is visible. The configuration of this nearby structure to the east-southeast may be indicative of a former gasoline service station. The structure is located on a seemingly commercial street, with surrounding areas generally consisting of vacant land. A few more seemingly residential structures appear east of the subject property by 1989 and remain to present day. The historical topographic maps reviewed depict the eastern adjacent properties as undeveloped land from 1901 with structures appearing by 1953 and remaining to present day.

Southern Adjacent Properties

Based on our review of the available aerial photographs of the subject property and surrounding areas, it appears that the southern adjacent properties, across Lakeshore Drive, have been undeveloped since 1938 and remain as such to present day. The historical topographic maps reviewed depict the southern adjacent properties as undeveloped land from 1901 with structures appearing by 1953 and remaining to present day. Beyond immediately adjacent southern properties is Lake Elsinore and has been present since at least 1901 to present day.

Western Adjacent Property

Based on our review of the available aerial photographs of the subject property and surrounding areas, it appears that the western adjacent properties have been undeveloped since 1938 with few small structures appearing by 1953 and no longer seen by 1978. Western adjacent properties remain vacant until 2005, when small developments appear. However, by 2009, western adjacent properties are again vacant and remain as such to present day. Historical topographic maps reviewed depict the western adjacent properties as undeveloped land from 1901 with structures appearing by 1953 and remaining to present day.

Gaps in Historical Sources

Several gaps of greater than five years were identified in the historical records reviewed, from 1901 to 1938, 1938 to 1949, 1953 to 1961, 1961 to 1967, 1967 to 1973, and 1994 to 2005. These gaps are considered insignificant because the subject property use appears to be similar prior to and following the gaps.

Interviews

Rincon Consultants attempted to perform interviews regarding the subject property and surrounding areas. The purpose of the interviews was to discuss current and historical conditions and to obtain information indicating the presence of recognized environmental conditions in connection with the subject property.

Interview with Owner

An interview questionnaire provided by Rincon was completed by Hamid Majidi on the behalf of all the subject property shareholders and owners. A copy of the completed questionnaire is included in Appendix A. The following information is based on our review of the completed questionnaire.

The property owner indicated the following:

- The subject property currently consists of vacant, undeveloped land. The subject property or the adjoining properties may have possibly been used as farmland in the past.
- The northern adjacent property is currently and was formerly vacant and consists of subdivided plots for residential use, except for one single family to the northeast of the subject property.
- The eastern adjacent property is currently and was formerly used for residential purposes.
- The southern adjacent properties consist of vacant land and Lake Elsinore.
- The western adjacent properties are currently and were previously zoned for commercial neighborhood land use.
- Lakeview Centre, LLC is the current property owner.
- Lakeview Centre, LLC obtained ownership of the subject property in August 2018.
- There are no structures on the subject property.
- The former owner of the subject property is unknown.
- No hazardous wastes are generated onsite, and no hazardous materials or petroleum products are used or stored onsite.
- A site-specific geotechnical report is available for the subject property and was provided to Rincon.
- A Title Report is available for the subject property and was provided to Rincon. The Title Report shows an easement reserved by the Temescal Water Company in 1908 for the subject property for the purposes of water distribution for domestic and irrigational use.

The property owner representative indicated that he is unaware of the presence of industrial drums, storage tanks (above or below ground), pits, ponds, lagoons, sumps, clarifiers, solvent degreasers, stained soil, vent pipes, fill pipes, or access ways, stained surfaces, transformers, capacitors, or hydraulic equipment, records indicating the presence of PCBs, or records indicating the presence of pesticides or herbicides at the subject property.

The property owner representative also indicated that he is not aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property. In addition, he is not aware of any notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

The following geotechnical report was provided to Rincon:

- *Soil and Foundation Evaluation Report – Proposed Commercial Buildings – Lots 14-17 APN Numbers; 375-092-002, 003, 004, 005, & 006, Lakeshore Drive, Lake Elsinore, California* prepared by Soil Pacific Inc. and dated February 13, 2019. The report concluded that proposed construction is feasible from a soils engineering standpoint. The report also encountered four geologic units on the subject property, being “(Qaf); alluvium and colluvium (Qal/Qcol) – which is correlative with Morton’s alluvium (Qyva); a phyllite, or slate, bedrock (Mzp); and an igneous bedrock (Khg).”

Interview with Site Manager

The site manager was not interviewed as part of this Phase I ESA.

Interviews with Occupants

Because the subject property is vacant, undeveloped land, no occupants were interviewed as part of this research effort.

Interviews with Local Government Officials

Based on the sufficient information obtained from EDR, GeoTracker (SWRCB online database) and Envirostor (DTSC online database), no additional local government officials were interviewed as part of this Phase I ESA.

Interviews with Others

In an email exchange with Ali R. Badie of A.B. Design Group, Ali stated that the eastern adjacent properties, in around 1960 until approximately 1990, consisted of a “restaurant, a local environmental consultant office, and a small residential unit.”

Site Reconnaissance

Rincon Consultants performed an unaccompanied reconnaissance of the subject property on August 20, 2019. The purpose of the reconnaissance was to observe existing subject property conditions and to obtain information indicating the presence of recognized environmental conditions in connection with the property.

Methodology and Limiting Conditions

The site reconnaissance was conducted by:

1. Traversing the subject property,
2. Observing the subject property from public thoroughfares,
3. Observing the adjacent properties from public thoroughfares,
4. Observing the subject property from driveways, roads, and walking paths.

Current Use of the Property and Adjacent Properties

The subject property currently consists of vacant, undeveloped, hilly land. Adjacent properties largely consist of vacant land with few single-family residences and restaurants.

Past Use of the Property and Adjacent Properties

Based on our site reconnaissance, past uses at the subject property and adjacent properties are not readily apparent.

Current or Past Uses in the Surrounding Areas

The subject property is mostly surrounded by vacant land with some residential and commercial use sparsely spread throughout as detailed in the Site Description section of this report. Past uses of the surrounding area are not readily apparent based on the site reconnaissance.

Geologic, Hydrogeologic, Hydrologic, and Topographic Conditions

Geologic, hydrogeologic, hydrologic, and topographic information are as previously stated in the Physical Settings Section of this report.

General Description of Structures

The subject property currently consists of vacant, undeveloped land, there are no onsite structures.

Exterior Observations

Hazardous Substances and Petroleum Products in Connection with Identified Uses

Rincon did not observe any hazardous substances, petroleum products, or releases at the subject property during the site reconnaissance.

Storage Tanks

During the site reconnaissance, Rincon did not observe any above ground or below ground storage tanks at the subject property.

Odors

During the site reconnaissance, Rincon did not identify any strong, pungent, or noxious odors.

Drums

During the site reconnaissance, Rincon observed did not observe any drums at the subject property.

Hazardous Substances and Petroleum Products Containers Not in Connection with Identified Uses

Hazardous substances or petroleum products not in connection with identified uses were not observed at the subject property.

Unidentified Substance Containers

Unidentified substance containers or unidentified containers that might contain hazardous substances were not observed during the site reconnaissance.

Indications of Polychlorinated Biphenyls (PCBs)

During the site reconnaissance, Rincon did not observe indications of PCBs, nor any electrical transformers, on the subject property.

Other Conditions of Concern

During the site reconnaissance, Rincon did not note any of the following:

- Clarifiers and sumps
- Degreasers/parts washers
- Pits, ponds, and lagoons
- Stressed vegetation
- Waste water
- Septic systems/effluent disposal system
- Stains or corrosion
- Stained soil or stained pavement
- Solid waste/debris
- Wells

Evaluation

Findings & Opinions

Although the subject property owner indicated that the subject property and adjacent properties may have been utilized for agricultural uses in the past, there was no onsite evidence of former agricultural use and there was no historic aerial photograph evidence of past agricultural use. Therefore, the potential former agricultural use is considered de minimis.

Historical aerial photographs, from approximately 1960 until 1990, depict a former structure to the east-southeast of the subject property, along Lakeshore Drive. Although the structure and site set-up at this nearby and downgradient property is configured similar to a gasoline service station, building permit and UST records were not available at the County of Riverside / Fire Department. In an email exchange with Ali R. Badie of A.B. Group Designs, Ali stated that the eastern adjacent properties in that time span consisted of a restaurant, an office, and a residential home. If the forementioned structure was indeed a gas station, it is downgradient of the water flow at the subject property and is located approximately 150 feet south east. Therefore, the unsubstantiated presence of a former gasoline service station, located nearby and downgradient of the subject property, is considered de minimis.

No recognized or unknown environmental conditions associated with the subject property were identified.

Conclusions & Recommendations

Rincon has performed a Phase I ESA in general conformance with the scope and limitations of ASTM E 1527-13 for the property identified as Lakeview Plaza and Assessor's Parcel Numbers 375-092-002 through 2-006 located on the corner of Lakeshore Drive and Manning Street in Lake Elsinore, California. Any exceptions to, or deletions from, this practice are described in the Deviations section of this report. This assessment has revealed no evidence of RECs in connection with the subject property.

Because we have no evidence indicating that the subject property has been impacted by hazardous materials or petroleum products, no additional assessment is recommended.

Deviations

Deviations from ASTM E 1527-13 practice were encountered during the completion of this Phase I ESA as a lien search was not completed as part of this assessment.

Signatures of Environmental Professionals

The qualified environmental professionals that are responsible for preparing the report include Walt Hamann and Julie Welch Marshall. Their qualifications are summarized in the following section.

"We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 312.10 of 40 CFR 312. We have the specific qualifications based on education, training and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."

Qualifications of Environmental Consultants

The environmental consultants responsible for conducting this Phase I ESA and preparing the report include Walt Hamman, Julie Welch Marshall, and Vladimir Pavlushkin. Their qualifications are summarized below.

Environmental Consultant Qualifications	X2.1.1 (2) (i) - Professional Engineer or Professional Geologist License or Registration, and 3 years of full-time relevant experience	X2.1.1 (2) (ii) - Licensed or certified by the Federal Government, State, Tribe, or U.S. Territory to perform environmental inquiries	X2.1.1 (2) (iii) – Baccalaureate or Higher Degree from and accredited institution of higher education in a discipline of engineering or science and the equivalent of 5 years of full-time relevant experience	X2.1.1 (2) (iii) – Equivalent of 10 years of full-time relevant experience
Walt Hamann	PG		MS Geology	30 years
Julie Welch Marshall			BS Environmental Engineering	24 years
Vladimir Pavlushkin			BS Chemical Engineering	2 years

Walt Hamann, PG, CEG, CHG, is a Principal and Senior Geologist with Rincon Consultants. He holds a Bachelor of Arts degree in geology from the University of California, Santa Barbara and a Master of Science degree in geology from the University of California, Los Angeles. He has over 30 years of experience conducting assessment and remediation projects and has prepared or overseen the preparation of hundreds of Phase I and Phase II Environmental Site Assessments throughout California. Mr. Hamann is a Professional Geologist (#4742), Certified Engineering Geologist (#1635), and Certified Hydrogeologist (#208) with the State of California.

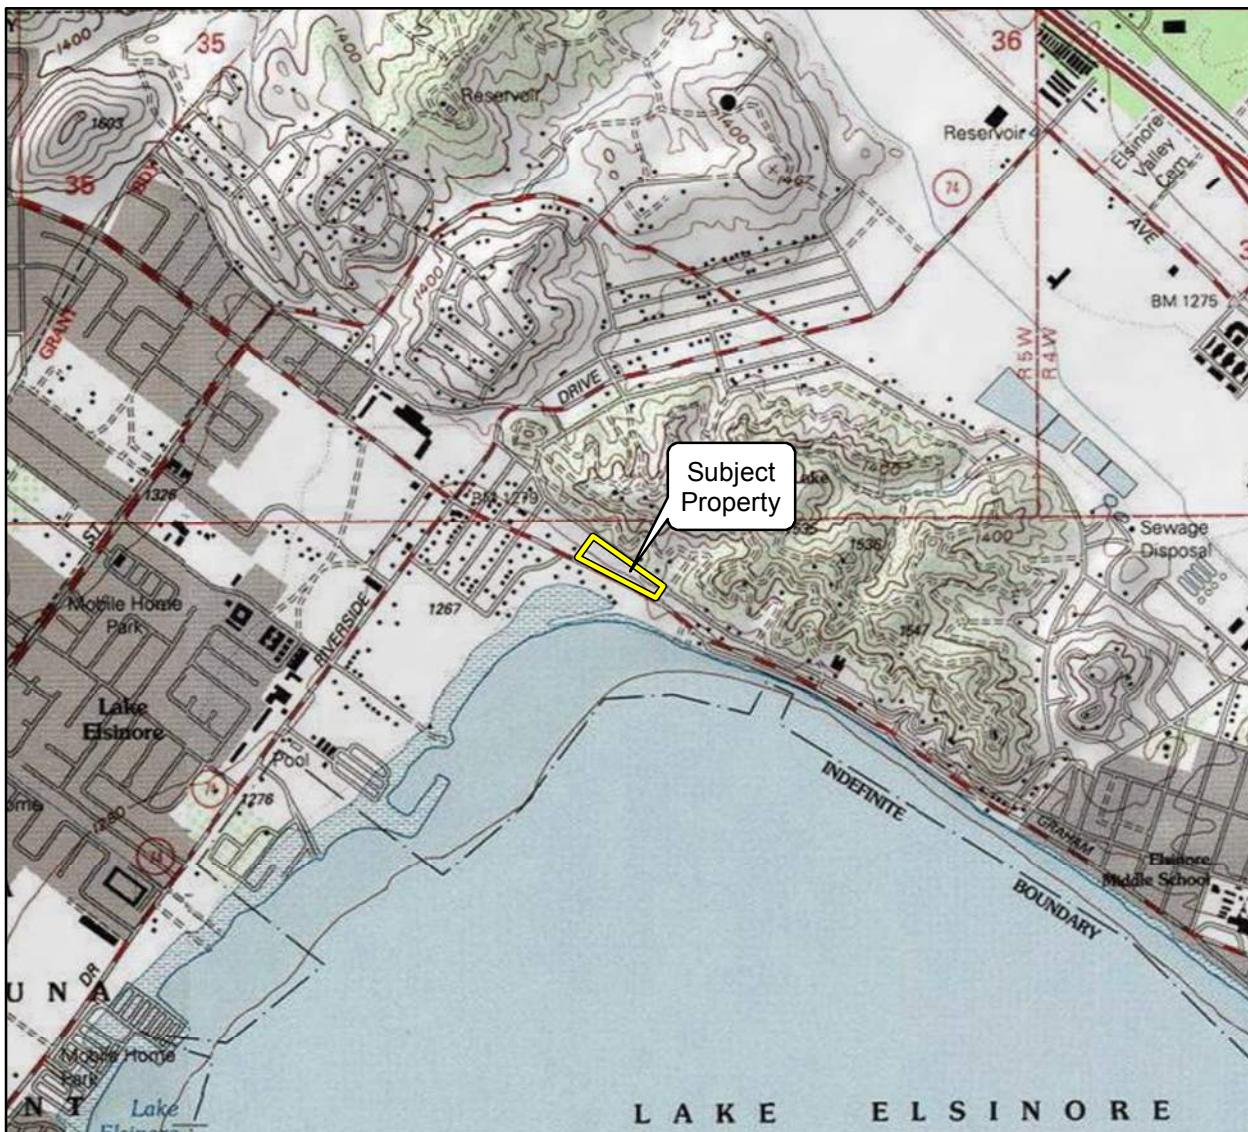

Julie Welch Marshall is a Senior Project Manager with Rincon Consultants. She holds a Bachelor of Science degree in environmental engineering from Rensselaer Polytechnic Institute, Troy, New York, a Hazardous Materials Management Certificate from the University of California, Santa Barbara Extension program, and a Business Management Certificate from the University of California, San Diego Extension program. Ms. Marshall's responsibilities at Rincon include implementation of site assessments and development of site remediation programs within the Environmental Site Assessment and Remediation Group. Ms. Marshall has extensive experience performing Due Diligence Phase I and Phase II Environmental Site Assessments as well as managing Brownfields and various remediation projects. She has 24 years of experience conducting research, assessment and remediation projects in California.

Vladimir Pavlushkin is an Environmental Engineer with Rincon Consultants. He holds a Bachelor of Science degree in Chemical Engineering from the University of California, Davis. His environmental experience with Phase II Site Assessment and remediation projects includes sampling and coordination, analytical data review, environmental compliance tracking, and preparation of technical reports for a variety of commercial and residential properties. Mr. Pavlushkin's responsibilities at Rincon include implementation of Phase I and II Environmental Site Assessments.

Photograph 9. View of the subject property from the corner of Manning Street and Lakeshore Drive, facing northwest.

Photograph 10. View of the northern adjacent properties from the corner of Manning Street and Lakeshore Drive, facing north. The northern adjacent properties (eastern portion) appear to be occupied by a single family residential home.

Photograph 11. View of the southern adjacent properties from the corner of Manning Street and Lakeshore Drive, facing southwest. The southern adjacent area is vacant, moderately wooded land.

Photograph 12. View of the eastern adjacent properties from the corner of Manning Street and Lakeshore Drive, facing east. The eastern adjacent properties are largely vacant except for a few residential single family homes.

Appendix A

Interview Documentation

Property Owner Interview Questionnaire

Rincon Project Number: 19-08174

Site Name and Full Address: Lakeview Plaza on corner of Lakeshore Drive and Manning Street, Lake Elsinore, CA

This questionnaire should be completed by the current property owner or a designated representative of the current property owner. We respectfully request that you fill out and return this form via fax at (510) 343-9650 or email to us at vpavlushkin@rinconconsultants.com within one week from the date of this transmittal.

1. Was the subject property or any adjoining property ever used as:

<input type="checkbox"/> an airport	<input type="checkbox"/> a Department of Defense facility or training area
<input type="checkbox"/> a fire training area	<input type="checkbox"/> a junkyard or landfill
<input type="checkbox"/> a gasoline or other fueling station	<input type="checkbox"/> a waste treatment, storage, disposal, processing or recycling facility
<input type="checkbox"/> a motor vehicle repair facility	<input type="checkbox"/> a machine shop
<input type="checkbox"/> a commercial printing facility	<input type="checkbox"/> a manufacturing facility
<input type="checkbox"/> a dry cleaners	<input type="checkbox"/> an oil production facility (including oil wells)
<input type="checkbox"/> a photo developing laboratory	<input type="checkbox"/> any other industrial use
<input type="checkbox"/> a metal plating facility	
<input type="checkbox"/> a farm	

Please check all that apply above and describe:

Vacant Land Maybe as farmland in the past

2. Please describe the current land uses of the subject property and those surrounding your property. Please indicate all businesses/companies located on property.**2a. Current Use of Subject Property:**

Please check all that apply:

<input type="checkbox"/> Commercial (retail, offices, etc.)
<input type="checkbox"/> Residential (single family or apartments)
<input type="checkbox"/> Industrial (manufacturing, warehousing, processing)
<input checked="" type="checkbox"/> Other- Please Describe

Please include a brief description of current operation:

Vacant undeveloped land

2b. Current Use of Northern Adjoining Properties:

Please check all that apply:

<input type="checkbox"/> Commercial (retail, offices, etc.)
<input checked="" type="checkbox"/> Residential (single family or apartments)
<input type="checkbox"/> Industrial (manufacturing, warehousing, processing)
<input checked="" type="checkbox"/> Other- Please Describe

Please include a brief description of current operation:

Vacant Land ...subdivided plots for residential use, There is only one single family located at north side of the lot

Rincon Project Number: 19-08174

Site Name and Full Address: Lakeview Plaza on corner of Lakeshore Drive and Manning Street, Lake Elsinore, CA

2c. Current Use of Eastern Adjoining Properties:

Please check all that apply:

- Commercial (retail, offices, etc.)
- Residential (single family or apartments)
- Industrial (manufacturing, warehousing, processing)
- Other- Please Describe

Please include a brief description of current operation:

2d. Current Use of Southern Adjoining Properties:

Please check all that apply:

- Commercial (retail, offices, etc.)
- Residential (single family or apartments)
- Industrial (manufacturing, warehousing, processing)
- Other- Please Describe

Please include a brief description of current operation:

Lake Elsinore

2e. Current Use of Western Adjoining Properties:

Please check all that apply:

- Commercial (retail, offices, etc.)
- Residential (single family or apartments)
- Industrial (manufacturing, warehousing, processing)
- Other- Please Describe

Please include a brief description of current operation:

Vacant Lot- Zone as commercial neighbourhood C-1

3. Please describe the previous land uses of your property and those surrounding your property. Include property ownership and dates of operation if known.

3a. Previous Use of Subject Property:

Please check all that apply:

- Commercial (retail, offices, etc.)
- Residential (single family or apartments)
- Industrial (manufacturing, warehousing, processing)
- Other- Please Describe

Please include a brief description of current operation:

Vacant Lot- Zone as commercial neighbourhood C-1

3b. Previous Use of Northern Adjoining Properties:

Please check all that apply:

- Commercial (retail, offices, etc.)
- Residential (single family or apartments)
- Industrial (manufacturing, warehousing, processing)
- Other- Please Describe

Please include a brief description of current operation:

Vacant Land ...subdivided plots for residential use,

Rincon Project Number: 19-08174

Site Name and Full Address: Lakeview Plaza on corner of Lakeshore Drive and Manning Street, Lake Elsinore, CA

3c. Previous Use of Eastern Adjoining Properties:

Please check all that apply:

- Commercial (retail, offices, etc.)
- Residential (single family or apartments)
- Industrial (manufacturing, warehousing, processing)
- Other- Please Describe

Please include a brief description of current operation:

3d. Previous Use of Southern Adjoining Properties:

Please check all that apply:

- Commercial (retail, offices, etc.)
- Residential (single family or apartments)
- Industrial (manufacturing, warehousing, processing)
- Other- Please Describe

Please include a brief description of current operation:

Lake Elsinore

3e. Previous Use of Western Adjoining Properties:

Please check all that apply:

- Commercial (retail, offices, etc.)
- Residential (single family or apartments)
- Industrial (manufacturing, warehousing, processing)
- Other- Please Describe

Please include a brief description of current operation:

Vacant Lot- Zone as commercial neighbourhood C-1

4. Who is the current owner of the property?

Lakeview Centre LLC

5. When did current ownership begin?

August 2018

6. What is the age of the on-site facility?

N.A.

7. Who is the previous owner of the property?

Q?

8. Please indicate the property's current:

Electrical service provider

None

Natural Gas service provider

None

Water service provider

None

Sewer service provider

None

Solid waste hauler

None

Rincon Project Number: 19-08174

Site Name and Full Address: Lakeview Plaza on corner of Lakeshore Drive and Manning Street, Lake Elsinore, CA

9. To the best of your knowledge, has your facility previously or does your facility currently store or use any of the following individual containers larger than 5 gallons in volume or 50 gallons in the aggregate? (if Yes or Unknown, include how many, type, and size)

<input type="checkbox"/> Damaged or discarded automotive or industrial batteries	
<input type="checkbox"/> Paints	
<input type="checkbox"/> Oils or solvents	
<input type="checkbox"/> Motor vehicle fleet	
<input type="checkbox"/> Pesticides or herbicides	
<input type="checkbox"/> Other chemicals or hazardous substances	

10. Please indicate any wastes generated at the facility:

Hazardous Waste	Quantity	Disposal Method

11. Are there currently or to the best of your knowledge have there been previously, any industrial drums (typically 55 gallon) or sacks of chemicals located on the property or at the facility?

<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown	If Yes or Unknown, please describe:
--	-------------------------------------

12. Are there currently or to the best of your knowledge have there been previously, any evidence of fill dirt having been brought onto the property that originated from a contaminated site or that is of an unknown origin?

<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown	If Yes or Unknown, please describe:
--	-------------------------------------

Rincon Project Number: 19-08174

Site Name and Full Address: Lakeview Plaza on corner of Lakeshore Drive and Manning Street, Lake Elsinore, CA

13. Are there currently or to the best of your knowledge have there been previously, any pits, ponds or lagoons located on the property in connection with waste treatment or waste disposal?

<input type="checkbox"/> Yes	If Yes or Unknown, please describe:
<input checked="" type="checkbox"/> No	
<input type="checkbox"/> Unknown	

14. Are there currently or to the best of your knowledge have there been previously, any sumps, clarifiers, or solvent degreasers on the property?

<input type="checkbox"/> Yes	If Yes or Unknown, please describe:
<input checked="" type="checkbox"/> No	
<input type="checkbox"/> Unknown	

15. Are there currently or to the best of your knowledge have there been previously, any stained soil on the property?

<input type="checkbox"/> Yes	If Yes or Unknown, please describe:
<input checked="" type="checkbox"/> No	
<input type="checkbox"/> Unknown	

16. Are there currently or to the best of your knowledge have there been previously, any storage tanks (above or below ground) located on the property?

<input type="checkbox"/> Yes	If Yes or Unknown, please describe:
<input checked="" type="checkbox"/> No	
<input type="checkbox"/> Unknown	

17. Are there currently or to the best of your knowledge have there been previously, any vent pipes, fill pipes, or access ways (etc.) indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?

<input type="checkbox"/> Yes	If Yes or Unknown, please describe:
<input checked="" type="checkbox"/> No	
<input type="checkbox"/> Unknown	

18. If the property is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system or has the well been designated as contaminated by any government agency?

<input type="checkbox"/> Yes	If Yes or Unknown, please describe:
<input checked="" type="checkbox"/> No	
<input type="checkbox"/> Unknown	

Rincon Project Number: 19-08174

Site Name and Full Address: Lakeview Plaza on corner of Lakeshore Drive and Manning Street, Lake Elsinore, CA

19. Are there currently or to the best of your knowledge have there been previously, any flooring, drains, or walls located within the facility that are stained by substances other than water, or are emitting foul odors?

<input type="checkbox"/> Yes	If Yes or Unknown, please describe:
<input checked="" type="checkbox"/> No	
<input type="checkbox"/> Unknown	

20. To the best of your knowledge has your facility previously or does your facility currently, discharge wastewater on or adjacent to the property other than storm water into a sanitary sewer system?

<input type="checkbox"/> Yes	If Yes or Unknown, please describe:
<input checked="" type="checkbox"/> No	
<input type="checkbox"/> Unknown	

21. Have any of the following ever been dumped above grade, buried and/or burned on the property? (please check all that apply and describe if possible)

<input type="checkbox"/> Hazardous substances	
<input type="checkbox"/> Petroleum products	
<input type="checkbox"/> Unidentified waste materials	
<input type="checkbox"/> Tires	
<input type="checkbox"/> Automotive or industrial batteries	
<input type="checkbox"/> Other waste materials (please describe)	

22. Are there currently or to the best of your knowledge have there been previously, a transformer, capacitor or any hydraulic equipment on the property?

<input type="checkbox"/> Yes	If Yes or Unknown, please describe:
<input checked="" type="checkbox"/> No	
<input type="checkbox"/> Unknown	

23. Are there currently or to the best of your knowledge have there been previously any records indicating the presence of PCBs?

<input type="checkbox"/> Yes	If Yes or Unknown, please describe:
<input checked="" type="checkbox"/> No	
<input type="checkbox"/> Unknown	

Rincon Project Number: 19-08174

Site Name and Full Address: Lakeview Plaza on corner of Lakeshore Drive and Manning Street, Lake Elsinore, CA

24. Are there currently or to the best of your knowledge have there been previously any records indicating the presence of pesticides or herbicides?

<input type="checkbox"/> Yes	If Yes or Unknown, please describe:
<input checked="" type="checkbox"/> No	
<input type="checkbox"/> Unknown	

25. Do you have any knowledge of environmental liens that may have been recorded against the property or governmental notification relating to past or recurrent violations of environmental laws with respect to the property or any facility located on the property?

<input type="checkbox"/> Yes	If Yes or Unknown, please describe:
<input checked="" type="checkbox"/> No	
<input type="checkbox"/> Unknown	

26. Do you have any knowledge of activity and use limitations (AULs) such as engineering controls, deed restrictions, land use restrictions, or institutional controls that may have been recorded against the property?

<input type="checkbox"/> Yes	If Yes or Unknown, please describe:
<input checked="" type="checkbox"/> No	
<input type="checkbox"/> Unknown	

27. Have you been informed of the past or current existence of hazardous substances, petroleum products, or environmental violations with respect to the property or any facility located on the property?

<input type="checkbox"/> Yes	If Yes or Unknown, please describe:
<input checked="" type="checkbox"/> No	
<input type="checkbox"/> Unknown	

28. Do you have any knowledge of any environmental site assessments of the property or facility?

<input type="checkbox"/> Yes	If Yes or Unknown, please describe:
<input checked="" type="checkbox"/> No	
<input type="checkbox"/> Unknown	

29. Do you know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release of any hazardous substances or petroleum products involving the property by any owner or occupant of the property?

<input type="checkbox"/> Yes	If Yes or Unknown, please describe:
<input checked="" type="checkbox"/> No	
<input type="checkbox"/> Unknown	

Rincon Project Number: 19-08174

Site Name and Full Address: Lakeview Plaza on corner of Lakeshore Drive and Manning Street, Lake Elsinore, CA

30. Are there any site-specific geotechnical or geologic reports available for the subject property?

<input checked="" type="checkbox"/> Yes	If Yes or Unknown, please describe:
<input type="checkbox"/> No	
<input type="checkbox"/> Unknown	

If Yes or Unknown, please describe:
Soil Pacific Inc. Geotech Report - Feb 2019

31. Is there a Title Report available for the subject property?

<input checked="" type="checkbox"/> Yes	If Yes or Unknown, please describe:
<input type="checkbox"/> No	
<input type="checkbox"/> Unknown	

If Yes or Unknown, please describe:
Chicago Title Co.Order No.: 111802549-MD

User Questionnaire

Rincon Project Number: **19-08174**

Site Name and Full Address: **Lakeview Plaza on corner of Lakeshore Drive and Manning Street, Lake Elsinore, CA**

To qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “Brownfields Amendments”), the user must provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that “all appropriate inquiries” is not complete.

We respectfully request that you fill out this form and email it to Vladimir Pavlushkin at vpavlushkin@rinconconsultants.com within one week from the date of this transmittal.

Project Description

1. Why is the Phase I ESA required or being performed?

Per city request,

2. What type of property transaction is planned? (i.e. sale, purchase, exchange)

Future Commercial plan development and sales

3. What is the entire site address?

Vacant Lot at North East corner of Lakeshore Drive and Manning Street cross street, Lake Elsinore, California

4. What is the Assessor's Parcel Number(s)?

APN 375-092-002 through 006

5. Are any considerations beyond the requirements of Practice E1527 to be considered? (i.e. lien search, asbestos & lead based paint, radon)

N.A.

Rincon Project Number: 19-08174

Site Name and Full Address: Lakeview Plaza on corner of Lakeshore Drive and Manning Street, Lake Elsinore, CA

6. Identify all parties who will rely on the Phase I report.

City of Lake Elsinore, Planning department.

7. Identify the Site Manager/Contact and how the contact can be reached.

Shahin Motamed Hashemi, Project Manager, Lakeview Centre LLC

8. Identify the Site Owner and how the owner can be reached.

Mr. Richard Sabeh, Lakeview Centre LLC, Rsabeh5@gmail.com, 415-640-7014
3311 Brenham Street, Tustin, CA 92782

9. Do you have copies of any available prior environmental site assessment reports, documents, correspondence, etc., concerning any other knowledge or experience with the property that may be pertinent to the environmental professional (i.e. title report, chain of title, previous Ph I and II ESAs, Environmental Impact Studies)?

None

Rincon Project Number: 19-08174

Site Name and Full Address: Lakeview Plaza on corner of Lakeshore Drive and Manning Street, Lake Elsinore, CA

Subject Property Information

1. Did a search of recorded land title records (or judicial records, where appropriate) identify any environmental liens filed or recorded against the property?

Please mark the box with the most appropriate response:

I have not reviewed the records and do not know if there are any filed or recorded environmental liens.

I have reviewed the records, and No, there aren't any filed or recorded environmental liens.

I have reviewed the records, and Yes, there are environmental liens. Explain:

2. Did a search of recorded land title records (or judicial records, where appropriate) identify any activity and land use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?

Please mark the box with the most appropriate response:

I have not reviewed the records and do not know if there are any filed/recorded AULs or any AULs in place at the site.

I have reviewed the records, and No, there aren't any filed/recorded AULs or any AULs in place at the site.

I have reviewed the records, and Yes, there are AULs filed, recorded, and/or in place at the site. Explain:

3. Does the Title Report provide any information pertaining to environmental cleanup liens or activity and use limitations (AULs) for the subject property?

Please mark the box with the most appropriate response:

I have not reviewed the Title Report and do not know if it provides environmental cleanup liens or AULs information.

I have reviewed the Title Report, and No, it does not provide environmental cleanup liens or AULs information..

I have reviewed the Title Report, and Yes, it does provide environmental cleanup liens or AULs information. Explain:

Rincon Project Number: 19-08174

Site Name and Full Address: Lakeview Plaza on corner of Lakeshore Drive and Manning Street, Lake Elsinore, CA

4. Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Please mark the box with the most appropriate response:

No, I do not have any specialized knowledge and/or experience related to the property or nearby properties.

Yes, I do have specialized knowledge and/or experience related to the property or nearby properties. Explain:

5. As the user of this ESA, based on your knowledge and experience related to the property, are you aware of any information pertaining to a reduction in value for the subject property relative to any known environmental issues?

Please mark the box with the most appropriate response:

No, I do not have any information about a reduction in property value relative to environmental issues.

Yes, I do have information about a reduction in property value relative to environmental issues. Explain:

6. Does the purchase price being paid for this property reasonably reflect the fair market value of the property?

Please mark the box with the most appropriate response:

Yes, I do believe the purchase price being paid for this property reasonably reflects the fair market value of the property. Skip to question #7.

No, I do not believe the purchase price being paid for this property reasonably reflects the fair market value of the property. Proceed to question #6a.

a. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? (40 CFR 312.29)

Please mark the box with the most appropriate response

No, I have not considered the idea that known or believed contamination at the site has caused the lower purchase price.

Yes, I have considered the idea that known or believed contamination at the site has caused the lower purchase price. Explain:

Rincon Project Number: 19-08174

Site Name and Full Address: Lakeview Plaza on corner of Lakeshore Drive and Manning Street, Lake Elsinore, CA

7. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:

Please mark the box with the most appropriate response:

a. Do you know the past uses of the property?

I do not know.
 I do know. Explain:

b. Do you know of specific chemicals are present or once were present at the property?

I do not know.
 I do know. Explain:

c. Do you know of any spills or other chemical releases that have taken place at the property?

I do not know.
 I do know. Explain:

d. Do you know of any environmental cleanups have taken place at the property?

I do not know.
 I do know. Explain:

8. Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

Please mark the box with the most appropriate response:

No, I do not know and/or do not have any experience with any obvious indicators that point to the presence or likely presence of contamination at the property.
 Yes, I do know of and/or do have experience with obvious indicators that point to the presence or likely presence of contamination at the property. Explain:

Rincon Project Number: 19-08174

Site Name and Full Address: Lakeview Plaza on corner of Lakeshore Drive and Manning Street, Lake Elsinore, CA

9. Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products, in, on, or from the site?

Please mark the box with the most appropriate response:

No, I am not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products, in, on, or from the site.

Yes, I am aware of pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site. Explain:

10. Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site?

Please mark the box with the most appropriate response:

No, I am not aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site.

Yes, I am aware of pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site. Explain:

11. Are you aware of any notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?

Please mark the box with the most appropriate response:

No, I am not aware of any notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products..

Yes, I am aware of a notice, or notices, from a government entity (or multiple government entities) regarding a possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products. Explain:

Rincon Project Number: 19-08174

Site Name and Full Address: Lakeview Plaza on corner of Lakeshore Drive and Manning Street, Lake Elsinore, CA

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

RGA LUST..... Recovered Government Archive Leaking Underground Storage Tank

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 5 LUST sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

SWRCY: A listing of recycling facilities in California.

A review of the SWRCY list, as provided by EDR, and dated 03/11/2019 has revealed that there is 1 SWRCY site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
REPLANET LLC Cert Id: RC177973.001	16750 LAKESHORE DR	WNW 1/4 - 1/2 (0.418 mi.)	10	28

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
EL SINORE WATER DISTR Status: A Tank Status: A Comp Number: 58252	16899 LAKESHORE DR	WNW 1/8 - 1/4 (0.215 mi.)	B3	14

HIST UST: Historical UST Registered Database.

A review of the HIST UST list, as provided by EDR, and dated 10/15/1990 has revealed that there are 4 HIST UST sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Status: Completed - Case Closed
Status Date: 12/08/2011
Case Worker: Not reported
RB Case Number: 083300483T
Local Agency: Not reported
File Location: Local Agency
Local Case Number: 89236
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: ***Data prior to 2005 does not appear in GeoTracker. Consult agency file for all site data*** In 1982, a leak was confirmed in the product line leading to the eastern dispenser island. The tanks were removed and replaced in 1983. Between 1982 and 2000, 15 soil borings, 36 monitoring wells, and 5 vapor extraction wells were drilled at the site. The hydrocarbon impacted soils were limited to the vicinity of the former dispenser islands and southernmost existing dispenser island. Phase-separated hydrocarbons were detected in well numbers B-1, B-3, and B-7 in 1982. All of these wells were abandoned in 1992. A SVE test was completed successfully in 1991 and 1994. The unit was operated from 1999 to 2003 using 8 SVE wells. 28200 lbs of hydrocarbons were removed. 3 confirmation borings drilled in 2005 showed 9800 ppm TPHg and 35 ppm benzene at 35 in CB-5. An additional SVE well was installed near CB-5 screened from 35-40. The system was operated from 2006 to 2007. 1290 additional lbs of hydrocarbons were removed. A confirmation boring was drilled March 27, 2008 to 40. 15 ppm TPHg was detected at 5, 0.46 ppm at 35, and 3.3 ppm at 40. Benzene was detected at 0.24 ppm at 40. Toluene was detected at 1.4 ppm at 40. Ethylbenzene was detected at 0.028 ppm at 5 and 0.11 ppm at 40. Xylenes were detected at 0.008 ppm at 5 and 0.84 ppm at 40. MTBE was not detected. The groundwater was sampled quarterly and went from free product to 2100 ppb TPHg, 3 ppb benzene, 1 ppb toluene, 4 ppb ethylbenzene, 27 ppb xylenes, 40 ppb MTBE, 140 ppb TBA, and 93 ppb DIPE. Closure was requested however RCDEH requested additional groundwater sampling. The groundwater was tested for 3 more quarters. During the last sampling event 8 wells had TPHg with a high of 850 ppb in BH-23. Well BH-23 had benzene at 0.5J ppb. 10 wells had MTBE with a high of 72 ppb in well 37. 7 wells had TBA with a high of 94 ppb in well B-05A. 6 wells had DIPE with a high of 90 ppb in well 31. No wells had ethanol or methanol. 10/2011 - current status - waiting on well destructions prior to issuance of NFA letter 12/8/2011 - Case closed

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/11/2019

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g. the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

	Data Release Frequency: Quarterly

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

Date of Government Version: 04/30/2012	Source: Los Angeles County Department of Public Works

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

West Map:	5636463 ALBERHILL, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

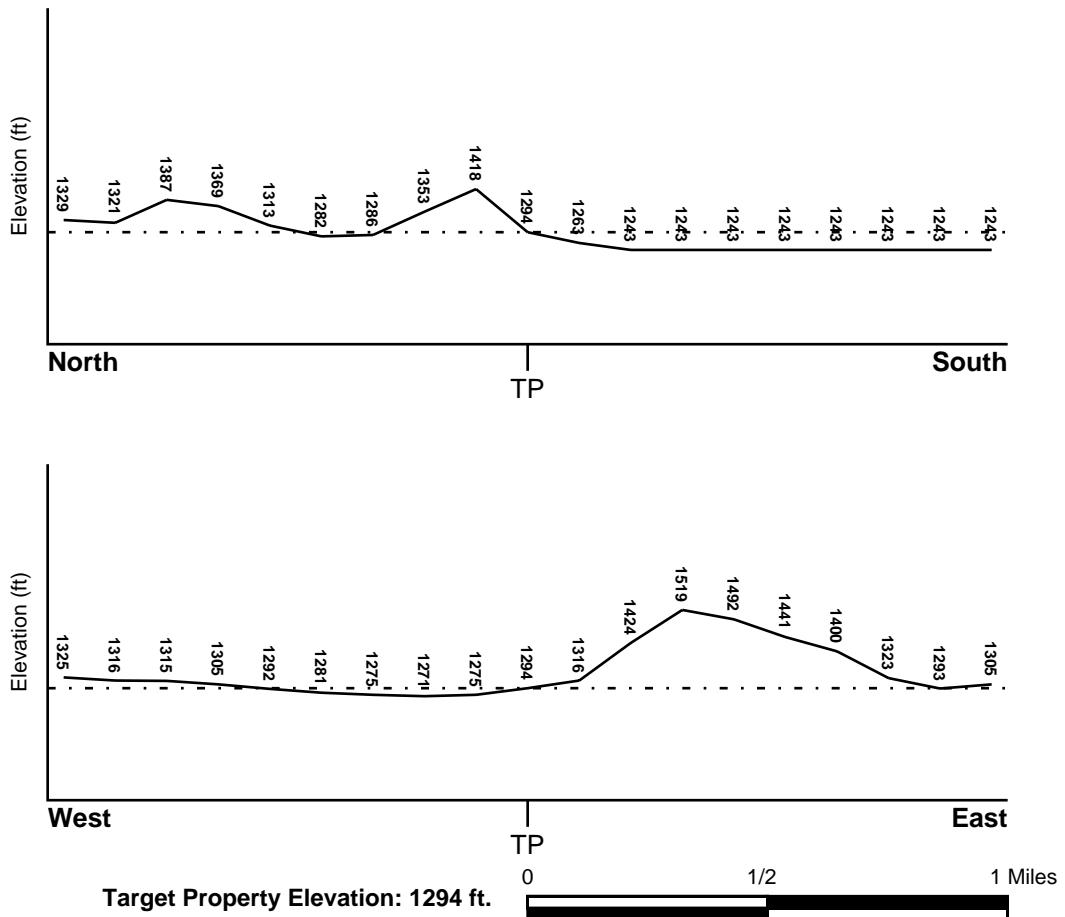

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

06065C2037G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	NWI Electronic
NOT AVAILABLE	<u>Data Coverage</u>
	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
1	1/4 - 1/2 Mile NW	WSW
1G	1/4 - 1/2 Mile NW	WSW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: ARBUCKLE

Soil Surface Texture: gravelly loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information								
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil			
1	0 inches	25 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Clayey Gravel	Max: 4 Min: 1.4	Max: 7.8 Min: 5.6	
2	25 inches	44 inches	gravelly clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Clayey Gravel	Max: 4 Min: 1.4	Max: 7.8 Min: 5.6	
3	44 inches	68 inches	stratified very gravelly sandy loam to very gravelly sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Clayey Gravel	Max: 4 Min: 1.4	Max: 7.8 Min: 5.6	

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: LODO
 Soil Surface Texture: gravelly loam
 Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
 Soil Drainage Class: Somewhat excessively drained
 Hydric Status: Not hydric
 Corrosion Potential - Uncoated Steel: Low
 Depth to Bedrock Min: > 38 inches
 Depth to Watertable Min: > 0 inches

Soil Layer Information								
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil			
1	0 inches	7 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 4 Min: 1.4	Max: Min:	
2	7 inches	18 inches	unweathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 4 Min: 1.4	Max: Min:	

Soil Map ID: 3

Soil Component Name: GRANGEVILLE
 Soil Surface Texture: fine sandy loam
 Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
 Soil Drainage Class: Moderately well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information								
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)	
	Upper	Lower		AASHTO Group	Unified Soil			
1	0 inches	35 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 8.4 Min: 6.6	
2	35 inches	64 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 8.4 Min: 6.6	

Soil Map ID: 4

Soil Component Name: GRANGEVILLE

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information								
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil			
1	0 inches	16 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 9 Min: 7.4	
2	16 inches	59 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 9 Min: 7.4	

Soil Map ID: 5

Soil Component Name: Water

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 8

Soil Component Name:

HANFORD

Soil Surface Texture:

coarse sandy loam

Hydrologic Group:

Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:

Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min:

> 0 inches

Depth to Watertable Min:

> 0 inches

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.
