### **APPENDIX 3.3:**

## **EXISTING (2015) CONDITIONS TRAFFIC SIGNAL WARRANT ANALYSIS WORKSHEETS**

This Page Intentionally Left Blank

### Figure 4C-3. Warrant 3, Peak Hour

Traffic Conditions = **Existing (2015) Conditions - Weekday PM Peak Hour**

Major Street Name = **Nichols Road**

Total of Both Approaches (VPH) = **820**

Number of Approach Lanes on Major Street = **1**

Minor Street Name = **I-15 Southbound Ramps**

High Volume Approach (VPH) = **199**

Number of Approach Lanes On Minor Street = **1**

\*Note: 150 vph applies as the lower threshold for a minor-street approach with two or more lanes  
and 100 vph applies as the lower threshold for a minor-street approach with one lane

### Figure 4C-3. Warrant 3, Peak Hour

Traffic Conditions = **Existing (2015) Conditions - Weekday AM Peak Hour**

Major Street Name = **Nichols Road**

Total of Both Approaches (VPH) = **577**

Number of Approach Lanes on Major Street = **1**

Minor Street Name = **I-15 Northbound Ramps**

High Volume Approach (VPH) = **183**

Number of Approach Lanes On Minor Street = **1**

\*Note: 150 vph applies as the lower threshold for a minor-street approach with two or more lanes  
and 100 vph applies as the lower threshold for a minor-street approach with one lane

**Subject:** RE: 09599: Nichols Mine Expansion Scope

Charlene,

I looked over the Table-6 and everything in the list looks still valid. I reviewed all of our recent applications and have found only one project that has been applied for and in process that should be included. Please add the following recent applications:

- Ness Industrial Garage: IDR for a 12,956 SF Light industrial building located on a .91 Acre site. The proposed project is generally located on the southwest corner of Minthorn and Birch St. and more specifically referred to as APN: 377-430-060

Please let me know if you need anything else.

Hi Justin,

I am following up on the cumulative list for the Nichols Mine project. Please let me know if you need any information from me! Thanks in advance!

Charlene,

I will forward on the list on Monday.

Justin.

Thanks Susan! No, I have not received an updated cumulative list from the City yet.

Charlene,

Justin and I spoke this morning and the scope is good to go. Did you get the answer to the cumulative list?

Thanks,

Susan

Hi Susan,

Attached is the revised scoping agreement per our e-mail chain below. As I mentioned, the baseline data is based on historical data which the applicant can supply at the City's request. I did a quick comparison of the actual intersection counts that we took during the AM and PM peak periods and it is very low in comparison to the historical baseline. I think as part of the traffic study, we should bump up

the existing data to reflect the baseline conditions which are summarized on Table 5 of the attached scoping agreement in order to make sure the baseline is consistent. The traffic study will evaluate the delta associated with the projected increase in the production over existing levels. Please let me know if you have any questions/comments.

Hi Justin,

Could you please let me know if you will be providing any updated list of cumulative projects or if I should contact and follow up with someone else there at the City? I have already reached out to and received a list of cumulative projects from the County of Riverside. Thanks in advance!

Regards,

Hi Charlene. I understand the issue with fluxuations, which is why I asked about records of daily truck counts so the existing trips are based on actual operations. I really feel like the trucks line up outside the gate before 7 AM to load (typical with this operation) and leave early in a higher volume than the more evenly distributed assumptions made. Does that make sense? I've done studies for these uses before and that's pretty normal.

Let me know what you think...

Hi Susan,

I wanted to discuss with you the baseline. I had taken it out in our revised scope, but after having a call with the Project team this morning – I think it's appropriate if we add it back. The historic baseline we established is based on historic data over the last 7 years or so. Their concern with taking only 1 day counts and using it as the baseline is that it does not account for the fluctuation in traffic to and from their site. There are days where they have an increase of traffic and others where the traffic is low. The applicant feels that the baseline average we originally provided is a better representation of the traffic that is being generated by the current production levels (650,000 TPY).. Let me know if you are okay with us adding the baseline back and I will keep the other changes you made and get a revised scope back into you today. Feel free to call me if you would like to discuss. Thanks in advance!

## **APPENDIX 5.2:**

### **E+P CONDITIONS TRAFFIC SIGNAL WARRANT ANALYSIS WORKSHEETS**

This Page Intentionally Left Blank

Figure 4C-3. Warrant 3, Peak Hour

Traffic Conditions = Existing plus Project Conditions - Weekday PM Peak Hour

Major Street Name = Nichols Road  
Total of Both Approaches (VPH) = 854  
Number of Approach Lanes on Major Street = 1

Minor Street Name = I-15 Southbound Ramps  
High Volume Approach (VPH) = 217  
Number of Approach Lanes On Minor Street = 1

\*Note: 150 vph applies as the lower threshold for a minor-street approach with two or more lanes and 100 vph applies as the lower threshold for a minor-street approach with one lane

**Figure 4C-3. Warrant 3, Peak Hour**

Traffic Conditions = **Existing plus Project Conditions - Weekday AM Peak Hour**

Major Street Name = **Nichols Road**

Total of Both Approaches (VPH) = **671**  
Number of Approach Lanes on Major Street = **1**

Minor Street Name = **I-15 Northbound Ramps**

High Volume Approach (VPH) = **239**  
Number of Approach Lanes On Minor Street = **1**

\*Note: 150 vph applies as the lower threshold for a minor-street approach with two or more lanes  
and 100 vph applies as the lower threshold for a minor-street approach with one lane

## **APPENDIX 6.2:**

### **EAP (2016) CONDITIONS TRAFFIC SIGNAL WARRANT ANALYSIS WORKSHEETS**

This Page Intentionally Left Blank

### Figure 4C-3. Warrant 3, Peak Hour

Traffic Conditions = **EAP (2016) Conditions - Weekday PM Peak Hour**

Major Street Name = **Nichols Road**

Total of Both Approaches (VPH) = **869**

Number of Approach Lanes on Major Street = **1**

Minor Street Name = **I-15 Southbound Ramps**

High Volume Approach (VPH) = **220**

Number of Approach Lanes On Minor Street = **1**

\*Note: 150 vph applies as the lower threshold for a minor-street approach with two or more lanes  
and 100 vph applies as the lower threshold for a minor-street approach with one lane

### Figure 4C-3. Warrant 3, Peak Hour

Traffic Conditions = **EAP (2016) Conditions - Weekday AM Peak Hour**

Major Street Name = **Nichols Road**

Total of Both Approaches (VPH) = **681**

Number of Approach Lanes on Major Street = **1**

Minor Street Name = **I-15 Northbound Ramps**

High Volume Approach (VPH) = **243**

Number of Approach Lanes On Minor Street = **1**

\*Note: 150 vph applies as the lower threshold for a minor-street approach with two or more lanes  
and 100 vph applies as the lower threshold for a minor-street approach with one lane

## **APPENDIX 7.2:**

### **EAPC (2016) CONDITIONS TRAFFIC SIGNAL WARRANT ANALYSIS WORKSHEETS**

This Page Intentionally Left Blank

### Figure 4C-3. Warrant 3, Peak Hour

Traffic Conditions = **EAPC (2016) Conditions - Weekday PM Peak Hour**

Major Street Name = **Nichols Road**

Total of Both Approaches (VPH) = **1819**

Number of Approach Lanes on Major Street = **1**

Minor Street Name = **I-15 Southbound Ramps**

High Volume Approach (VPH) = **470**

Number of Approach Lanes On Minor Street = **1**

\*Note: 150 vph applies as the lower threshold for a minor-street approach with two or more lanes  
and 100 vph applies as the lower threshold for a minor-street approach with one lane

### Figure 4C-3. Warrant 3, Peak Hour

Traffic Conditions = **EAPC (2016) Conditions - Weekday AM Peak Hour**

Major Street Name = **Nichols Road**

Total of Both Approaches (VPH) = **1409**

Number of Approach Lanes on Major Street = **1**

Minor Street Name = **I-15 Northbound Ramps**

High Volume Approach (VPH) = **503**

Number of Approach Lanes On Minor Street = **1**

\*Note: 150 vph applies as the lower threshold for a minor-street approach with two or more lanes  
and 100 vph applies as the lower threshold for a minor-street approach with one lane
