

## **City of Lake Elsinore Releases Public Draft of the Climate Action and Adaptation Plan for Community Review**

**For Immediate Release – January 12, 2026**

**Lake Elsinore, CA** — The City of Lake Elsinore has released the public draft of the Climate Action and Adaptation Plan (CAAP) and invites community members to review the document and provide feedback.

The CAAP serves as a long-term roadmap to reduce greenhouse gas emissions while strengthening the City's resilience to climate-related impacts. The plan outlines strategies to reduce emissions from key sources such as buildings, transportation, and waste, while also preparing the community for challenges including extreme heat, wildfire smoke, and severe weather.

In addition to addressing climate risks, the CAAP supports local benefits that enhance quality of life for residents, including cleaner air, improved public health, lower energy costs, expanded tree canopy, and more walkable neighborhoods—particularly for communities most affected by environmental and economic challenges.

Community members are encouraged to review the draft CAAP and share comments or questions. The plan is available online at <http://www.lake-elsinore.org/caap>, where residents can learn more and review the full document.

Public comments will be accepted from Monday, January 12, through Friday, January 23, 2026.

Feedback may be submitted via email to [dabraham@lake-elsinore.org](mailto:dabraham@lake-elsinore.org).

Lake Elsinore's Climate Action and Adaptation Plan is supported by the Adaptation Planning Grant Program, implemented by the Governor's Office of Land Use and Climate Innovation.
